Subject: RE: SO2 Questions

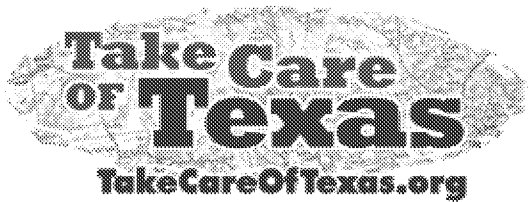

Hi Dayana, yes I sure did. Mike Feldman called me late last week with those answers. Thank you so much for checking!

Thank you too, Ruben!

I appreciate your help!

Mary Ann

Hi Mary Ann,

Did you get your SO2 questions answered by Ruben? If not, please let me know and I'll follow up with him.

Thanks,

Subject: RE: SO2 Questions

Hi Ruben,

Here are some clarifications to my questions. Attached is the SO2 Round 3 Designations final rule where Titus County (part) is shown as designated Attainment/Classifiable (see page 1163). As this is the remainder of Titus County that was not previously designated Nonattainment (in SO2 Designations Round 2 Supplement), it appears to me that Titus County is entirely designated. The weird thing is, that footnote 3 (under the table on that same page 1163) says that the remaining portion of Titus County will be designated by December 31, 2020. So I just want to find out for sure.

Regarding my question asking if EPA intends to designated Potter and Milam Counties (both already designated Unclassifiable) will be designated again in Round 4. I ask because I think I have seen in several places that Unclassifiable areas will be addressed (again, I guess) in Round 4 designations for the 2010 SO2 NAAQS.

Not trying to rush you; I know y'all are busy and still trying to catch-up, I was just thinking my questions may not have been clear enough and wanted to clarify them as best I could.

Thank you much!

Subject: RE: SO2 Questions

Hi Mary Ann,

Thanks, we are glad too! The Region 6 lead for SO2 designations and implementation is now Ruben Casso, who I've cc'ed in this email.

Ruben- Will you answer Mary Ann's questions. I'm afraid I might not have the most accurate/up to date information on these issues.

Thanks,

Subject: SO2 Questions

Hi Dayana!

I'm really glad there was no second government shut-down, and I hope all is well with you and EPA coworkers.

I was wondering if you can answer a couple of SO₂-related questions for me.

First, I was wondering if you know whether the EPA, in the Round 4 SO₂ designations, intends to address Potter and/or Milam Counties, which are both currently being monitored and also both designated unclassifiable. I think I read that EPA would be addressing the unclassifiable areas in Round 4.

Second, can you straighten out for me the designations for Titus County? In addition to the nonattainment area designated in R2 supplement, it appears the remaining portion of that county is designated unclassifiable/attainment in the Round 3 SO₂ designations (see attached final rule for R3, page 1163); however, on that same page footnote 3 states that that remaining portion of Titus will be designated by December 31, 2020 (Round 4). If you can help me understand, I would greatly appreciate it!

Thank you, thank you!
